Xpress meeting rooms drive positive business outcomes through rapid deployment of predictable technology-enabled meeting room experiences. A trifecta of an easy-to-order, easy-to-deploy and easy-to-operate experience based on a choice of collaboration platforms—Microsoft Teams, Google Meet, Zoom or Cisco Webex. Rock-solid design coupled with professional deployment methods, plus 24x7 help-desk support make Diversified Xpress rooms the flagship solution for enterprise customers seeking global technology standards for audio visual systems.

Xpress | GT

- Room Size: 2-12 Person
- Functionality: Presentation + Audio + Video Collaboration
- Collaboration Platform: Google Meet

PRESENTATION ONLY MODE

The presenter will see a table mounted touch screen and connect their computer or mobile device to the system. This is accomplished by simply plugging into the HDMI cable that is located at the table. The signal from the computer will be detected and the image will automatically appear on the display.

PRESENTATION + AUDIO CONFERENCING + VIDEO COLLABORATION MODE

If the presenter wants to share content and collaborate with remote participants using audio and video, they follow the directions on the screen to:

- Launch a scheduled Google Meet by tapping the "Title" of the scheduled meeting.
- Create a new meeting by pressing the "Join or Start a Meeting" Button

CUSTOM WALL MOUNT

The Google conference hardware is mounted behind the display in our proprietary mounting system which enables us to pre-build, kit and ship for rapid deployment. The sleek design delivers a clean look, meets ADA requirements, and swings out from the wall providing easy access for future servicing needs.

INCLUDED

- Hardware, software, cables, mounts, delivery, system programming and testing
- Labor and documentation for system installation and project management
- Manufacturer warranty plus one-year Diversified service

GT | COMPONENTS

*Costs may vary by region and building. Pricing does not include location specific taxes, travel to site, union labor rates or decommissioning of the existing AV equipment.

Please note that any modifications to the tables, wall, or floors to accommodate AV table cubbies, wall boxes or over the floor raceway will need to be coordinated with your general contractor or furniture partner. Costs for these modifications are not included in this estimate.

AVERAGE DELIVERY TIME | 6-8 WEEKS

ROOM REQUIREMENTS

To install this solution, the room must have the following infrastructure in place.

- A dedicated power outlet at the specified display location
- A network connection at the same display location
- Structural wall support to hold the display and components
- The ability to mount small equipment to the underside of the table

NEXT STEPS

A Diversified subject matter expert will contact you to:

- Collect more information to ensure that the packaged solution is compatible with the room(s) and furniture
- Understand the timeline in which you want the work completed
- Learn about the other stakeholders involved in the implementation
- Potentially schedule a site visit to coordinate details
- Provide a final estimate based on the information gathered
